

Redwood Community Health Coalition

Mission

The Redwood Community Health Coalition's mission is to improve access to and quality of care to underserved and uninsured people in Marin, Napa, Sonoma and Yolo counties.

Vision

Every person in the communities served by Redwood Community Health Coalition health centers has access to a patient-centered medical home.

Strategies

- Health centers collaborate together and with others to create a coordinated system of care for everyone in the four counties we serve.
- Health centers demonstrate to their communities, their fellow providers and policy makers improved outcomes and rational use of resources through integrated models of care and information technology.
- Our network provides member clinics with shared infrastructure (expertise, equipment and coordination) and a dynamic culture of quality attracting clinicians and other professionals.
- Our network operates from a sustainable business model based on the benefit it provides to the health care system and our communities.
