THOMAS S. BODENHEIMER, MD, MPH

On October 9th, Dr. Thomas Bodenheimer, one of our country's foremost experts in primary care design, will talk about why our health delivery system is not set up to provide quality primary/preventive care and how that translates into higher healthcare costs. He will also discuss what we need to know to help improve the quality of the healthcare in our community.

Dr. Bodenheimer attended Harvard Medical School and completed a residency in Internal Medicine at UCSF. He worked for 32 years as a primary care physician in San Francisco's Mission District, both in private practice and in community health centers.

SONOMA HEALTH ACCESS COALITION'S VISION

- 1. Primary care services and the promotion of healthy lifestyles are the foundation for a healthy community.**
- 2. The well-being and economic viability of the community depends on comprehensive, affordable and accessible health care.**
- 3. All people are valued and have access to culturally competent care.**
- 4. Access to the full spectrum of health services for women, children, and low income people are ensured and protected.**

Please email your questions to Pedro Toledo at ptoledo@RCHC.net.
